# Expert WaterDamage Repair

## WE KNOW WATER DAMAGE

When your property is damaged by water – whether from a burst pipe, flooding, storms, sprinkler deployment, or other cause – Paul Davis is the restoration company to call.

All Paul Davis Technicians are certified in Applied Structural Drying (ASD), a technique which maximizes the removal of water from building materials using scientific methods and specialized equipment. Our process combines air movement, temperature, and humidity control, minimizing disruption to the structure. ASD can often save materials like drywall and carpets, drying affected areas in as little as three days.

## WHY DRY INSTEAD OF REPLACE?

Less disruption – so property owners can get their lives back to normal faster.

Environmentally friendly – ASD requires little demolition, so fewer building materials are replaced and less waste is sent to landfills.

Cleaner air – the air is scrubbed to remove any odors or harmful airborne microbes.

Reduced mold risk – the potential for mold is limited because the drying process is scientifically monitored, measured and documented.

## WATER SERVICES

- 24/7 Emergency Response
- Loss Containment
- Water Extraction
- Applied Structural Drying (ASD)
- Mold Remediation
- Complete Restoration Services
- Reconstruction Services
